CYBERDESIGN WPF DEVELOPER ASSESSMENT AND HIRING PROCESS

BY: RACHIT BHATT (C0902810)

Cyberdesign WPF Developer Hiring Process

- **Application Submission:** Candidates apply online through their career portal, submitting their resume and cover letter.
- **Resume Screening:** Resumes are filtered by their custom software and the selected ones goes to the HR team to review resumes for assessment of candidates' qualifications and experiences.
- **Initial Contact:** Shortlisted candidates receive an initial contact, which may include a phone screen to discuss their background and interest in the role.
- **Technical Assessment:** Candidates complete a C# and WPF coding assessment to evaluate their programming skills and problem-solving abilities.
- **Technical Interview:** Successful candidates in the assessment phase proceed to one or more technical interviews. These discussions focus on coding solutions, problem-solving approaches, and in-depth knowledge of C# and WPF.
- **Behavioral Interview:** Candidates who pass the technical phase participate in a behavioral interview, emphasizing teamwork, communication, and alignment with their culture.
- **Managerial Interview:** Selected candidates may have an interview with a manager to discuss their fit within the team and the organization.
- **On-Site/Remote Interview:** Depending on the company's location or remote work policies, candidates may have additional interviews, either on-site or virtually.
- **Reference Check:** The HR Team and the Software Team contacts professional references provided by the candidate (if any).
- **Offer Negotiation:** Successful candidates receive a job offer, and negotiations may take place.
- **Background Check:** A thorough background check is conducted for the final candidate.
- **Onboarding:** The successful candidate goes through the onboarding process before starting the new role.

Assessment at Cyberdesign

- **Coding Assessment:** C# and WPF coding challenges to evaluate technical proficiency.
- **Technical Interview:** In-depth discussions on coding solutions, problem-solving, and C# and WPF knowledge.
- **Behavioral Interview:** Evaluation of teamwork, communication, and cultural fit.
- **Managerial Interview:** Assessment of fit within the team and alignment with organizational goals.
- **Reference Check:** Verification of professional references provided by the candidate.
