Kevision Systems

SAL COLLEGE OF ENGINEERING (113)

About

I was born and brought up in Ahmedabad, India. While playing games on computer and mobile while also having a strong grip on mathematics and science, eventually, coding became my hobby.

Ever since I started developing and coding, I followed the best practices and always tried to not only think from every aspect but also document the crucial steps. After pursuing my bachelor's in Computer Engineering, I got my first job at Kevision Systems, and here is where I was in the real furnace which made me dagger in a year. After leaving this wonderful organization, I dived into the field of Artificial Intelligence, one of the most vital fields in this industry. I believe I will be revolutionizing the IT industry using my skills and contribution to open-source platforms in the upcoming years.

While spending these many years in development, I am a sport-a-holic person and have various achievements in sports like cricket, volleyball, football, chess, and table tennis. Accomplishments like participating in tech events, hackathons, and techfests, show how I like to challenge myself to go beyond my limits.

With vast experience in this field, I am glad to have the confidence to contribute and resolve a defined or undefined problem and face the challenges in this field. Let us solve the problem together.
